Location Date/Time Deaths & Property & Event Type and Details Injuries Crop Dmg

This is the continuation path of the devastating supercell that moved slowly southeast along U.S. Highway 84 from Lamb County. Wind-driven hail as large as baseballs shattered home windows, destroyed siding, punctured roofs, heavily damaged vehicles, wiped out crops, and stripped trees across far northeast Hockley County. The mayor of Anton described the hail damage as the worst he had ever seen in decades of living on the Texas South Plains and declared a state of disaster. The American Red Cross said 100% of the roughly 400 homes in Anton sustained serious damage, with each home requiring on average \$6,000 of repairs. One resident of Anton was bruised by the large hail and cut by broken glass as he attempted to cover up shattered windows during the storm. About 8,000 acres of crops in extreme northeast Hockley County were a total loss from the hail, torrential rainfall and flooding that ensued

LUBBOCK COUNTY --- 6.7 NW SHALLOWATER ARPT [33.75, -102.08], 0.7 ENE SHALLOWATER [33.68, -101.97]

06/30/17 23:20 CST 6M Hail (2.50 in)

06/30/17 23:50 CST 10M Source: Social Media

This is the continuation path of the devastating supercell that affected Lamb and far northeast Hockley Counties. Wind-driven hail up to the size of tennis balls devastated area crops and caused moderate to heavy damage to about 100 rural homes in far northwest Lubbock County, generally northwest to just northeast of Shallowater. The heaviest toll was inflicted to roughly 40,000 acres of cotton, sorghum and corn which became a total loss after heavy rains and flooding eroded the young plants. Fortunately, the supercell storm dissipated northwest of Lubbock in response to a line of storms developing immediately to its southeast.

LUBBOCK COUNTY --- 3.9 S DOUD [33.51, -101.93]

06/30/17 23:30 CST 50K Lightning

06/30/17 23:30 CST 0 Source: Fire Department/Rescue

Lightning struck a two-story single family residence and proceeded to cause several small fires within the electrical wiring in the upstairs of the house. The family of four was uninjured, but displaced as fire crews tended to hot spots above the ceiling.

YOAKUM COUNTY --- PLAINS [33.18, -102.83]

06/30/17 23:35 CST 0 Hail (1.00 in)

 Source: Department of Highways

Sections of FM Road 835 and County Road 7000 flooded and were eventually closed by Texas DPS officials shortly after midnight CST on July 1st. The flooded roads focused along the west end of Buffalo Springs Lake.

A short-lived, but intense heat spell with highs of 102 to 108 came to an abrupt end late this evening as active northwest flow overspread the region. Isolated, high-based supercell thunderstorms erupted first near the U.S. Highway 83 corridor from Childress south to Aspermont, with even more intense supercells occurring later over the western South Plains. Some of these storms produced giant hail of 3 to 4 inches in diameter causing severe damage to crops, buildings and vehicles. Cities hit especially hard included Childress, Amherst, Littlefield, and Anton where combined property damages may exceed \$10 million with regional agricultural losses approaching \$50 million. Toward midnight CST, individual storms grew more linear over the southern South Plains before exiting southeast of the region before daybreak on July 1st.
